Tip of the Month

- ◆ As the bonus year comes to a close, review your measure scores
- ◆ Are there any pt mismatches/ data issues?
- ◆ Can any scores be pushed over the target by data that may not have extracted from the record?

Bonus Close 2025

- QHP is getting started on 2025 Bonus Close
- Manual audits
- Data outreaches
- Data reports
- Scores won't be final until June, so work to ensure they are complete.

D2E Updates

Offering Level Funded option to support smaller employers (down to 30 lives)

Level-Funded Plans

Employers pay a fixed monthly amount, sharing financial risk with a stop-loss insurer. This model offers predictable costs and can provide rebates for lower-than-expected claims.

Self-Funded Plans

Employers bear the full financial risk, paying for health claims as they occur. This could lead to significant savings with lower claims but comes with unpredictability and potential high costs.

A Physician-Hospital Organization (PHO) is a joint venture between physicians and a hospital/system that is authorized to contract with payers. A clinically integrated PHO is one that uses systems and processes to improve quality and reduce cost through evidence based medicine, performance measurement, information sharing, and alignment of incentives.
